PhD Student positions in Mathematical Analysis

The Department of Mathematical Sciences at the University of Oulu is seeking Phd Students (1-2) to work on geometric measure theory, fractal geometry or dynamical systems as a member of a research group which is a part of The Finnish Centre of Excellence in Analysis and Dynamics Research. The research of the group is concentrated on geometric properties of sets and measures using techniques from modern analysis, probability theory and dynamics. The research environment is highly international.

The salary is based on the teaching and research personnel pay scale levels 1-3, depending on the competence of the candidate. The personal work performance level is valuated separately. At the beginning, the salary will be approximately 2100 euros per month.

The appointments are for up to four years. There will be a trail period of four months. The positions are available immediately for suitably qualified candidates. An application letter and a CV should be sent by December 31, 2011 by e-mail to `ville.suomala@oulu.fi` or by regular mail:

Ville Suomala
Department of Mathematical Sciences
P. O. Box 3000
90014 University of Oulu
Finland

For further information, please contact Senior research fellow Ville Suomala (`ville.suomala@oulu.fi`) or Professor Maarit Järvenpää (`maarit.jarvenpaa@oulu.fi`)
